

Filtration & Separation

ECOFILL Total Cleanliness Management (TCM)

Total fluid management by optimal control & state of the art filtration technologies, fluid engineering and fluid services together with decades of expertise will definitely deliver our promise.

Ecofill Hi- Performance Industrial Filtration & Separation services is value for money!

ECOFILL Total Cleanliness Management (TCM)

ECOFILL has been active in the manufacturing of Filter-elements and Filter & Separating units for over 30 years.

We manufacture and supply a complete range of filtration / separation and purification products for mainly hydraulic and lubrication oil systems for many types of industries; concentrating on:

- Paper-mills,
- Aluminum extrusion plants
- Power plants.

Virtually every filter element can be manufactured in our factory at ECOFILL BV in the Netherlands.

Rentals

Ecofill offers an extensive range of Alfa Laval Oil/Water-dirt separators, PALL purifiers and PALL Filtration units.

Water contamination in oil systems enhances wear and as a result:

- The oil-film thickness is heavily reduced,
- Accelerated metal surface fatigue goes fast
- Corrosion an oil breakdown are bound to set in.

To minimize or prevent these processes it's absolutely necessary to efficiently remove water and dirt- contamination out of the system by (incidentally) making use of high performance filter units and or separators & purifiers.

ECOFILL offers these units for rent and for sale, fully equipped; with or without our skilled personnel, including field laboratory services and or online particle counting and water content measuring systems.

Examples of other application areas

Cutting fluids, cooling water, fuel, dielectric oil & air purification.

ECOFILL's Total Cleanliness Management program will result in reduced maintenance costs, longer lifetime of critical system parts, less downtime and as a result increased productivity.

ECOFILL: Enhancing fluid /air Cleanliness, advancing productivity and assuring reliability!

Features:

- Manufacturing
- Engineering & Services
- Fast deliveries
- Optifill is an ECOFILL registered trademark
- Needle felt & Spunbond cartridge production
